

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

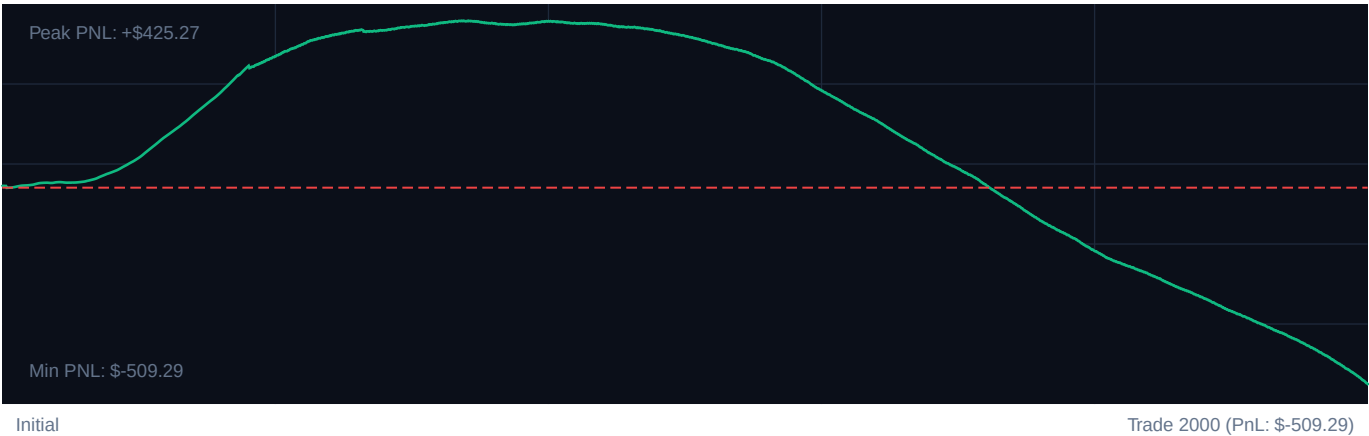

DATE GENERATED: 2026-05-27T20:52:33.823Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	2000	Calculated Profit Factor:	0.54
Win Accuracy:	39.3% (786W / 1214L)	Max Peak Drawdown:	9.0%
Cumulative PnL:	\$-509.29	Avg. PnL per Trade:	\$-0.25

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-400	91.8%	\$333.76	+110% [OK]
Trades 401-800	55.5%	\$90.50	+67% [OK]
Trades 801-1200	27.8%	\$-179.10	+22% [OK]
Trades 1201-1600	2.0%	\$-411.98	+2% [OK]
Trades 1601-2000	19.5%	\$-342.47	+16% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 2000 historical capture events.

Cumulative settlement yields are \$-509.29 with an established Profit Factor of 0.54.

Capital drawdown metrics remain extremely healthy, registering a peak drop of 9.0%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries.

The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to 77841347326748450x to limit trailing hazard vectors.
