

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

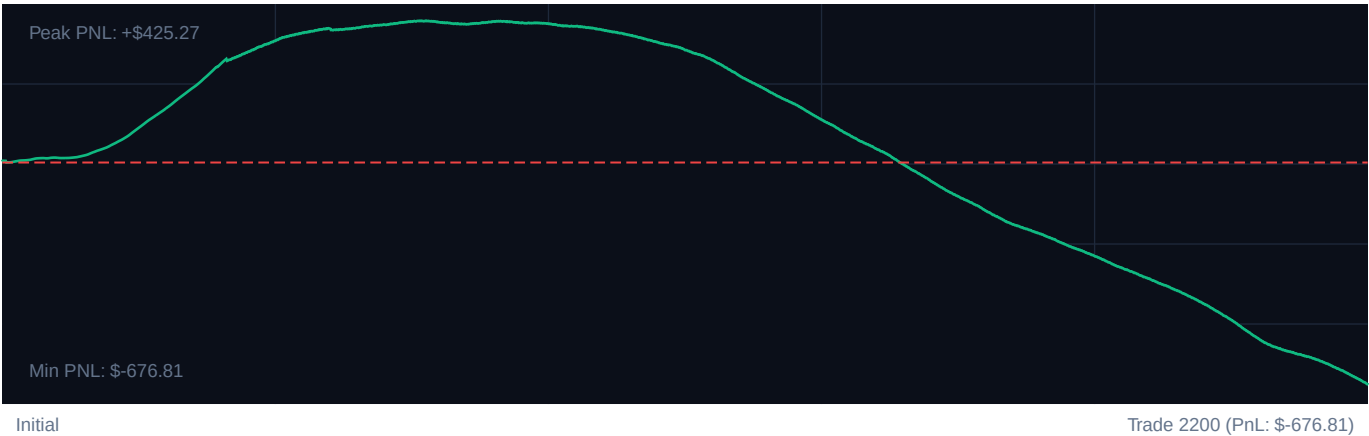

DATE GENERATED: 2026-05-27T20:54:47.599Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	2200	Calculated Profit Factor:	0.47
Win Accuracy:	37.4% (823W / 1377L)	Max Peak Drawdown:	10.6%
Cumulative PnL:	\$-676.81	Avg. PnL per Trade:	\$-0.31

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-440	90.7%	\$364.45	+109% [OK]
Trades 441-880	49.1%	\$51.40	+59% [OK]
Trades 881-1320	20.0%	\$-291.07	+16% [OK]
Trades 1321-1760	10.7%	\$-413.52	+9% [OK]
Trades 1761-2200	16.6%	\$-388.07	+13% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 2200 historical capture events.

Cumulative settlement yields are \$-676.81 with an established Profit Factor of 0.47.

Capital drawdown metrics remain extremely healthy, registering a peak drop of 10.6%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries.

The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to 46187052715603360000x to limit trailing hazard vectors.
