

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

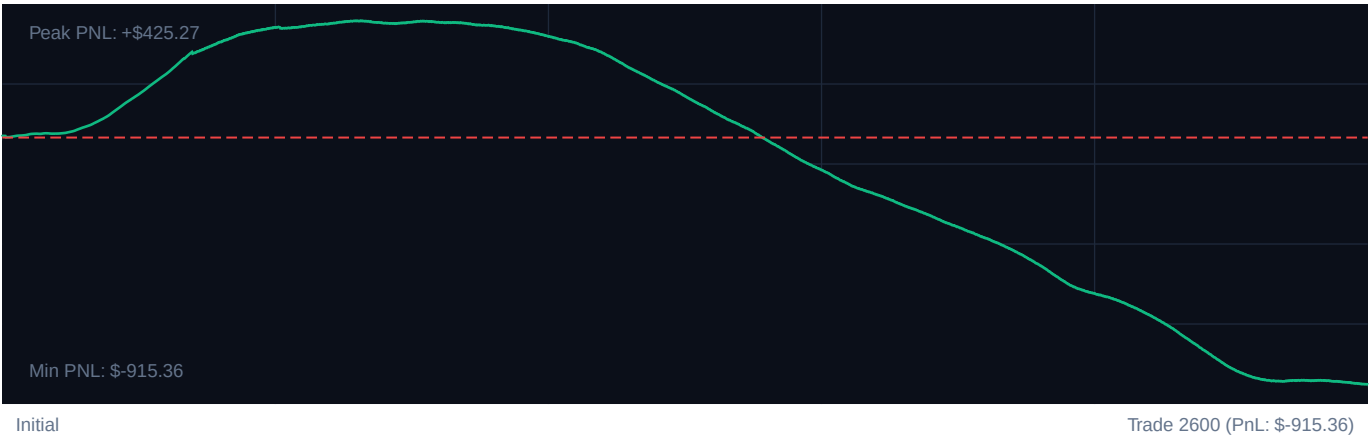

DATE GENERATED: 2026-05-27T20:59:14.009Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	2600	Calculated Profit Factor:	0.42
Win Accuracy:	35.0% (910W / 1690L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$-915.36	Avg. PnL per Trade:	\$-0.35

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-520	84.8%	\$399.71	+102% [OK]
Trades 521-1040	43.7%	\$-33.13	+35% [OK]
Trades 1041-1560	7.7%	\$-491.72	+6% [OK]
Trades 1561-2080	17.9%	\$-454.98	+14% [OK]
Trades 2081-2600	21.0%	\$-335.24	+17% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 2600 historical capture events.

Cumulative settlement yields are \$-915.36 with an established Profit Factor of 0.42.

Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries.

The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $6.896137223323733e+24x$ to limit trailing hazard vectors.
