

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

DATE GENERATED: 2026-05-27T21:37:00.030Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	6000	Calculated Profit Factor:	3.16
Win Accuracy:	68.0% (4079W / 1921L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$3509.67	Avg. PnL per Trade:	\$0.58

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-1200	58.3%	\$245.16	+70% [OK]
Trades 1201-2400	11.5%	-\$1142.58	+9% [OK]
Trades 2401-3600	74.7%	\$736.11	+90% [OK]
Trades 3601-4800	95.4%	\$1272.88	+115% [OK]
Trades 4801-6000	100.0%	\$2398.10	+120% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 6000 historical capture events.

Cumulative settlement yields are \$3509.67 with an established Profit Factor of 3.16. Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $2.164303275144119 \times 10^{25}x$ to limit trailing hazard vectors.
