

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

DATE GENERATED: 2026-05-27T22:10:20.023Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	9000	Calculated Profit Factor:	7.80
Win Accuracy:	78.7% (7079W / 1921L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$11044.64	Avg. PnL per Trade:	\$1.23

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-1800	42.1%	\$-321.80	+34% [OK]
Trades 1801-3600	54.2%	\$160.49	+65% [OK]
Trades 3601-5400	96.9%	\$2442.42	+116% [OK]
Trades 5401-7200	100.0%	\$2991.65	+120% [OK]
Trades 7201-9000	100.0%	\$5771.88	+120% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 9000 historical capture events.

Cumulative settlement yields are \$11044.64 with an established Profit Factor of 7.80. Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $2.164303275144119e+25x$ to limit trailing hazard vectors.
