

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

DATE GENERATED: 2026-05-27T22:17:00.071Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	9600	Calculated Profit Factor:	9.10
Win Accuracy:	80.0% (7679W / 1921L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$13166.80	Avg. PnL per Trade:	\$1.37

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-1920	40.9%	\$-417.16	+33% [OK]
Trades 1921-3840	61.9%	\$549.93	+74% [OK]
Trades 3841-5760	97.1%	\$2970.21	+117% [OK]
Trades 5761-7680	100.0%	\$3199.05	+120% [OK]
Trades 7681-9600	100.0%	\$6864.77	+120% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 9600 historical capture events.

Cumulative settlement yields are \$13166.80 with an established Profit Factor of 9.10. Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $2.164303275144119e+25x$ to limit trailing hazard vectors.
