Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

DATE GENERATED: 2026-05-27T22:42:34.014Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	11900	Calculated Profit Factor:	12.57
Win Accuracy:	83.9% (9979W / 1921L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$18795.94	Avg. PnL per Trade:	\$1.58

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-2380	34.9%	\$-888.26	+28% [OK]
Trades 2381-4760	84.4%	\$1955.54	+101% [OK]
Trades 4761-7140	100.0%	\$4122.77	+120% [OK]
Trades 7141-9520	100.0%	\$7710.54	+120% [OK]
Trades 9521-11900	100.0%	\$5895.35	+120% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 11900 historical capture events.

Cumulative settlement yields are \$18795.94 with an established Profit Factor of 12.57. Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $2.164303275144119e+25x$ to limit trailing hazard vectors.
