

SOVEREIGN SYSTEM SECTOR REPORT

Autonomous Mother Algorithm Performance Ledger & AI Advisory

SESSION ID: SESSION_MPOI7P62

DATE GENERATED: 2026-05-27T22:55:54.017Z

TARGET INSTRUMENT: R_75 Volatility Model

CORE PERFORMANCE METRICS

Total Settlements:	13100	Calculated Profit Factor:	11.79
Win Accuracy:	83.2% (10905W / 2195L)	Max Peak Drawdown:	12.9%
Cumulative PnL:	\$19890.77	Avg. PnL per Trade:	\$1.52

EQUITY CURVE PROGRESSION

PERFORMANCE MILESTONES (100-TRADE SEGMENTS)

SEGMENT	WIN RATE	NET PnL	REFINEMENT EFFICIENCY
Trades 1-2620	35.2%	\$-910.00	+28% [OK]
Trades 2621-5240	91.5%	\$2794.83	+110% [OK]
Trades 5241-7860	100.0%	\$4951.20	+120% [OK]
Trades 7861-10480	100.0%	\$8832.10	+120% [OK]
Trades 10481-13100	89.5%	\$4222.64	+107% [OK]

SOVEREIGN NARRATIVE ADVISORY

Cognitive Strategy Proposal & Adaptive Intelligence Logs

SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 13100 historical capture events.

Cumulative settlement yields are \$19890.77 with an established Profit Factor of 11.79. Capital drawdown metrics remain extremely healthy, registering a peak drop of 12.9%, well within institutional tolerances.

2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 27 (Safety Gated)
- RSI Upper Trigger: Adjust to 73 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to $2.752767317951e+28x$ to limit trailing hazard vectors.
