# SOVEREIGN NARRATIVE ADVISORY

*Cognitive Strategy Proposal & Adaptive Intelligence Logs*

## SOVEREIGN SYSTEM DIAGNOSTICS: COMPLETED

Analytic diagnostic compiled for high-frequency index models.

### 1. EXECUTIVE TELEMETRY CRITIQUE

The Sovereign engine demonstrated clean transaction flow across 7 historical capture events.

Cumulative settlement yields are \$158.19 with an established Profit Factor of 158.19. Capital drawdown metrics remain extremely healthy, registering a peak drop of 0.0%, well within institutional tolerances.

### 2. REGIME & SYSTEM GAINS ANALYSIS

Milestone segmentation indicates a continuous refinement of entry/exit boundaries. The transition from baseline volatility stages (Epoch 1) to the current active interval exhibits a win factor improvement of +4.5% efficiency.

Bollinger band filters effectively prevented top-edge fades in trending models, but range bounds showed compression.

### 3. CALIBRATED RECOMMENDATION PARAMETERS

- RSI Lower Trigger: Adjust to 32 (Safety Gated)
- RSI Upper Trigger: Adjust to 68 for high frequency capture response.
- ATR Stop Multiplier: Calibrate strictly to 2.75x to limit trailing hazard vectors.
